

# LCD Solution

- Graphical Touch Screen Interface
- Large 320 x 240 Pixel Display
- Extra Bright Cold-Cathode Fluorescent Display
- Easily View All Nexus Parameters
- View Out of Limit Alarms
- NEMA 4 Rated
- Real Time Trending
- Real Time Oscilloscope View
- Harmonic Spectrum Presentation
- EN50160 Flicker Screens
- View Multiple Meters with One Display

## Touch Screen HMI Display for the Nexus Series Meters

P60N

### Directly Interfaces with the Nexus Series Monitors

This unit receives power directly from the Nexus monitor internal power supply. A cable harness is included with the P60N that plugs directly into any of the Nexus RS485 port. Moreover, since the communication to the display uses RS485 communication, the display can be mounted up to 5000 feet from the Nexus monitor location. The Nexus power supply will supply power up to 100 feet from the Nexus monitor.

### Monitor Multiple Nexus Units

The P60N uses a programmable address that allows customer to switch up to 16 Nexus monitors for one display. This is very useful in cost saving applications where panel space is at a premium.

### Description

The P60N Touch-Screen Display provides real time readings, harmonics, waveforms and phasors from Nexus series power monitors. This technologically leading display offers a user-friendly touch-screen environment perfect for switch-gear panels, generator control panels, motor control centers, utility substations or any other power monitoring applications.

# LED Solution

- Multifunction Capabilities
- View Voltage, Current and Power Simultaneously
- Daisy Changing Slaves Using one Serial Port
- Clear, High-End Alpha - Numeric Reading Indicators
- Large, Bright LEDs for Easy Viewing

The P40N Series LED displays are compatible with all Nexus Series Power Monitors. With both a master and slave display arrangement, these displays allow you to provide annunciation for Voltage, Current and Power simultaneously. Using this technology, you will be able to replace your substation panel instrumentation using one base transducer and multiple displays. **Note that the Volts/Master (P40N) display must be in the loop to communicate with the slave displays.**

## Mounting and Dimensions:

**Nexus P60N Touch-Screen Display  
Front and Side View**

**Nexus P40N Display  
Cutout Pattern**

**Nexus P40N Display  
Front View**

**Nexus P40N Display  
Side View**

(Dimensions apply to P40N, P41N, P43N)

### Specifications:

#### Package Size

LCD 8.00" x 5.4" x 1.6"  
LED 4.38" x 4.38" x 1.5"

#### Backlight

LCD - CCFL with software control

#### Operating Temperature

LCD: 0 to 50 Degrees C  
LED: -40 to +80 Degrees C

#### Power Requirements

LCD 10 - 30VDC, 4.5 Watts  
LED 12 to 24 VDC, 3.5 Watts

### Ordering Information:

P60N - LCD Display

P40N - LED Master Display (Multifunction Defaults to Volts)

P41N - LED Slave Display Amps (Must have Master P40N in loop)

P43N - LED Slave Display Power (Must have Master P40N in loop)

PB1-12VO - Power Brick External Power Supply 125 Volts AC/DC Inputs, 12 Volts DC Output (necessary when powering multiple displays from a single Nexus or if displays are mounted more than 50 feet away)
