Accu-Measure™ Technology

Advanced Performance Smart Power Meter and Substation Data Acquisition Node

- Billing Grade Revenue Meter - 0.04%
- Precision Auto-calibrating Metrology
- RTU with I/O & Control
- Power Quality Recorder
- Onboard Ethernet Connectivity
- DNP 3.0 Level 2 Plus
- Extensive Communication Capabilities
- Smart Grid and Automation Solutions

Electro Industries/GaugeTech™
The Leader in Power Monitoring and Smart Grid Solutions™

www.electroind.com
Smart Grid and automated data collection solutions are the backbone of a modern power distribution system. From the residential metering point to the sophisticated transmission substation automation solutions, accurate and reliable data collection is critical to success. The advanced monitoring features of the Nexus® 1252 meter provide the total picture of power usage and power quality for any metered point within a power distribution network, allowing power related decisions to be made quickly and effectively. With EIG’s exclusive Total Web Solutions, you can monitor your Nexus® 1252 meter anytime and from anywhere via the Internet, and receive critical alarms via email when action is required.

**Technology Designed For Utilities, Industrial Users and Critical Power Applications**

**FOR ENERGY PROVIDERS**  
(Utilities, Municipals, ESPs, Independents, etc.)  
- Improve Substation Automation Solutions  
- Increase Power Distribution Reliability  
- Record Faults/Time Protective Equipment  
- Monitor Reliability of Breakers and Relays  
- Shed or Shift Loads Quickly  
- Identify and Manage Peak Demand  
- Heighten Response Time to PQ Events  
- Enhance Levels of Communication and Data Transmission  
- Provide Real Time Data on the Web

**FOR ENERGY CONSUMERS**  
(Industrial, Commercial, Government, etc.)  
- Real Time PQ Monitoring and Analysis  
- Efficiently Control/Manage Energy Consumption  
- Reduce Costs/Conserve Energy  
- Improve Operational Efficiency  
- Increase Productivity/Reduce Downtime  
- Optimize Loads/Extend Equipment Life  
- Identify and Respond to PQ Events Quickly  
- Avoid High Utility Penalties for Exceeding Usage  
- View Energy Usage and Power Quality through the Web

**Obtain High-End Power Quality and Accurate Billing Measurements**

High-performance energy usage and power quality meter data is always available at your fingertips with the Nexus® 1252 meter. It provides you with the necessary power system assessment information in real time. The Nexus® 1252 meter provides advanced power disturbance recording including EN 50160/IEC 61000-4-15 Flicker Analysis and detailed PQ reporting. Use the meter’s precision accuracy for primary metering or submetering, or for checking on an installed utility meter.

**Expandable I/O and Trending Customize the Nexus® 1252 Meter for Every Application**

The Nexus® 1252 meter offers virtually unlimited I/O capability in conjunction with all metering functions. Expandable I/Os enable the meter to be used for all metering and data-gathering applications. The meter's modular plug-in design allows you to add analog and digital I/Os to specifically meet your application. With this advanced I/O capability, you can use the Nexus® 1252 meter to replace RTUs and PLCs for energy management and substation automation solutions. Using this meter, you can monitor the reliability of system apparatus, such as transformers, circuit breakers, or other critical equipment.
Multi-Part Approach To Precision In Accuracy

The Nexus® 1252 unit is the first meter of its kind to utilize EIG’s patented Accu-measure™ technology. Accu-measure™ technology is a technique based on a multi-part approach that allows a field-mounted metering device to achieve laboratory grade accuracy.

DUAL HIGH POWERED 16 BIT A/D CONVERTERS

Dual 16 Bit A/D converters provide supreme sampling accuracy and resolution.

DUAL INTERNAL REFERENCES STABLE TO 5 PPM

The unit auto-adjusts to dual internal references stable to 5 parts per million. These references insure that the monitoring equipment maintains its calibration.

AUTO-CALIBRATION WITH TEMPERATURE COMPENSATION

The meter uses an auto-calibration technique that re-calibrates the unit on the fly when the temperature changes more than 5 degrees Celsius, monitoring for accuracy over temperature.

PRECISION ACCURACY SPECIFICATIONS

With Accu-measure™ technology, this unit meets ANSI C12.20 0.2% accuracy specifications for watt-hour accuracy.

Revenue Metering Features

TRANSFORMER LOSS AND LINE LOSS COMPENSATION

The unit compensates for transformer and line losses. Power reading compensation is conducted for both iron and copper losses.

CT AND PT COMPENSATION

The Nexus® unit compensates for errors in current transformers and potential transformers.
  • Voltage Compensation

TIME OF USE CAPABILITY

The Nexus® 1252 meter offers comprehensive time of use capability. Standard features include:
  • Bidirectional Consumption and Demand Quantities
  • 20 Year Calendar
  • 4 Seasons/Yr
  • 12 Holidays/Yr
  • 4 TOU Schedules/Season
  • Prior Month, Prior Season Storage
  • Present Month, Present Season Storage

MAX/MIN INTEGRATION AND RECORDING

The unit offers time stamped max and min values for almost all measured readings. A time stamp is associated with each max and min value. KW readings are integrated using:
  • Block (Fixed) Window
  • Thermal Window
  • Rolling (Sliding) Window
  • Predictive Window.

Any integration period is allowed. The default period is 15 minutes.

COINCIDENTAL READINGS

When logging max watt readings, the coincidental VARs at the time of the max are also recorded. You can determine the number of capacitors needed, identify peak inefficiencies and resolve many other issues.

PASSWORD PROTECTION PREVENTS UNAUTHORIZED TAMPERING

Two 10-character, alphanumeric passwords protect the unit from unauthorized tampering. The first level password is a general password allowing a user to view readings, but not to change them. The second level password allows the user to change and re-program the unit.

LOAD AGGREGATION/UNIVERSAL METERING

Using the status inputs, the meter has the ability to count pulses and aggregate different loads providing a total picture of the load and its component parts. The pulse inputs can be used to accumulate and aggregate all other utility values, such as water and gas.
  • 8 Pulse Inputs Standard
  • 4 Aggregators
  • 32 Additional External Pulse Inputs
16 BIT WAVEFORM EVENT AND FAULT RECORDER

The unit records up to 512 samples per cycle for a power quality event. Voltage and current is recorded with pre and post event analysis. Fault recording offers 8x full scale capture capability on current. All voltage and current readings are recorded using a 16 bit A/D converter, providing precise waveform resolution. Both hardware and software triggers are available to activate a waveform recording, which can be used for power quality surveys, fault analysis, breaker timing, etc.

MEASURE AND RECORD HARMONIC MAGNITUDES TO THE 255th ORDER

The unit measures harmonic magnitudes up to the 255th order for each voltage and current channel. Real time harmonic magnitudes are resolved to the 128th order. Percent THD and K-Factor are also calculated. This high performance harmonic analysis allows users to conduct power quality analysis at the high end of the harmonic spectrum.

SUBCYCLE TRANSIENT RECORDER

The unit records subcycle transients on voltage and current readings. It monitors switching noise from capacitors, static transfer switches, SCRs and many other “power quality harmful” devices. Transients are often the cause of intermittent and expensive periods of downtime. Without the Nexus® 1252 meter, solving these problems is often impossible.

STATUS INPUT TRIGGERS

The unit records the waveform at the time of the status change. The input change and waveform recording are time stamped to a 1 ms resolution. Up to 8 inputs can be plotted on the waveform. This enables a user to time the reliability of relays and circuit breakers.

ADDITIONAL INPUTS

The Nexus® 1252 meter offers inputs for Neutral to Ground voltage measurements. This allows you to analyze rising ground potential, which often damages electrical equipment. The unit also calculates and measures the neutral current.

INDEPENDENT ITIC/CBEMA LOG PLOTTING

The Nexus® 1252 meter stores an independent ITIC/CBEMA log for magnitude and duration of voltage events. With this log, the user can quickly view total surges, total sags and average duration, without having to retrieve waveform information.

PHASOR ANALYSIS

The monitor reads a phase angle analysis between the voltage and current channels, allowing for efficiency and system integrity analysis.
EN 50160/IEC 61000-4-15 FLICKER AND COMPLIANCE MONITORING (V2 ONLY)

It is important to maintain a source of high quality power to ensure efficient operations. One particular source of disturbance that can have very negative effects is Flicker. This consists of low frequency to intermittent line disturbances on the power line. Aside from effects on equipment, disturbances of this type can have negative effects on people.

One particular example of this is the flickering of light sources that can affect humans in different ways, depending on the severity.

The Nexus® 1252 meter with V-Switch™ key 2 measures to the Flicker requirements of EN 50160/IEC 61000-4-15 and includes:

- Flicker Evaluation-Instantaneous readings suitable for online monitoring; Short Term Readings (PST - 10 Min) - logging and monitoring; Long Term Readings (PLT - 4 hour) - logging and monitoring
- Polling Pinst, Pst, Pst Max, Pst Min, Pft, Pft Max, Pft Min values
- Log Viewer - view graphed values Pst and Plt for Va, Vb and Vc or displayed values, including Max and Min
- This meter is accurate for evaluation, but not compliance

INTERHARMONIC ANALYSIS

The Nexus® 1252 meter provides users with the ability to view Interharmonics, the discrete frequencies that lie between the harmonics of the power frequency voltage and current. Frequencies can now be observed which are not an integer multiple of the fundamental; and which can appear as discrete frequencies or as a wide-band spectrum.

The user can set a starting point anywhere in the waveform, assuming that there are enough sample points available after the starting point. If there are not enough points in this waveform capture, the software will check the next waveform record(s) stored in the database. If it is contiguous, additional points up to 200 ms will be retrieved for analysis.
Total Web Solutions—Providing Advanced Metering Data Integration With the Web

Total Web Solutions is an advanced Ethernet communication architecture that allows you to custom design webpages, display metering data and host your meter power information web site directly on a Nexus® meter. The Nexus® meter hosts the web data without any need for dedicated server software, ActiveX Controls or Java Applets. The meter does the data collection, the formatting and the page hosting. Additionally, this solution is very Information Technology department friendly because it creates almost no network traffic and provides all formatted data through an HTTP interface without resident client software.

ADVANCED FEATURES INCLUDE:

• Fully Customizable Webpage Development
• Direct Webpage Hosting with Live Readings
• Multiple Meter Hosting on One Page
• Read Direct from Meters (No Server Software Needed)
• No ActiveX Controls or Java Downloads
• IT Dept Friendly: Works through Firewalls; Low-Cost/High Functionality
• Instant Alarm Emails – Direct from the Meter

WEBEXPLORER (Directly Host Metering Data)

EIG’s WebExplorer provides you with direct access to all power data through a web browser without needing to download ActiveX Controls or Java Applets. Because it is a standard HTML webpage to an IT department, it works directly through corporate firewalls. WebExplorer is fully programmable so you can customize your own SCADA quality webpages, graphics and configurations.

• Easily Incorporated into Any Existing Web Applications
• Fully Programmable Webpage Generator
• Brings in Direct XML Links, Customizing Many Meters onto One Page
• Quick Page Upload Time
• Easily Passes through Firewalls
• No ActiveX Controls or Java Applets Downloaded to Client

WebXML provides totalized energy usage
WEBXML

Creates Real Time Data in XML Format. WebXML allows the Nexus® meter to gather data from the Nexus® host or through other meters and put the data directly into an XML format. This allows you to share data through the web with multiple applications and to create custom webpages, using WebExplorer. WebXML technology is easy to configure and extremely flexible. With WebXML, your data is instantly available to a host of software applications, including standard web browsers, spreadsheet applications, presentation software, and word processing applications, among others.

- XML Support
- Automatically Process and Present Data in Readable Format
- Add Scale Factors, Multipliers or Any Other Desired HTML Capability
- Display Data from Host Meter and/or Any Other Meter Using Modbus RTU or TCP/IP (WebReacher)
- Customized Programming for Data Collection
- Easily Viewed by Different Applications
- Modbus Data Concentrator

WEBREACHER

With EIG’s exclusive WebReacher technology, you can now access remote meters around the world, retrieve data and consolidate it onto one webpage or web site without any separate software SCADA package or client-side ActiveX Controls or Java Applets.

- No Additional Application Software Costs
- No Server System Required
- No Complex Integration
- No ActiveX Controls or Java Applets on Client
- No Costly Point Charges (Up to 32 Devices)

WEBALARM

EIG’s WebAlarm sends real time email alerts via the Internet to up to 9 recipients simultaneously for any combination of event notifications. With WebAlarm, you can easily program the type of email format for the alert: either short format for cell phones with text messaging service or long format that will provide detailed alarm conditions for any devices with full email support (computers, PDAs, cell phones).

- Real Time Alerts
- Simultaneous Emails to Multiple Recipients
- Update Users on Virtually Any Abnormality
- Uses Standard SMTP – Just Assign Email Addresses
- Shows the Last 10 Emails on Web Site for Later Investigation

WEBMOD

(Open Architecture 3rd Party Integration)

The 10/100BaseT design allows the unit to speak with 12 simultaneous sockets of Modbus TCP/IP. Once the card is placed inside the Nexus® meter, Port 2 becomes a gateway enabling other Modbus based IED equipment to be interfaced to the network LAN, thus allowing multiple requests to receive data simultaneously.

EIG’s WebMod features Modbus TCP/IP open protocol that can be easily integrated with most other software or hardware. And, with the built-in Modbus data concentrator, you can poll up to 8 devices or 512 unique polling items from any device that can speak Modbus RTU and/or Modbus TCP/IP protocols.

WEBDNP

Using this feature, you can gain access to the meter speaking native DNP over Ethernet. This allows the unit to open an exclusive network socket for DNP 3.0. Using this unique technology, all other meter web features are available simultaneously. Even with DNP 3.0 over the Ethernet, you still have access to multiple Modbus sockets, email alarms and many other communication features.
Multiple Programmable Memory Logs

The meter utilizes two separate logs of historical information. In addition to all power parameters, the historical logs allow users to trend data from Electro Industries’ remote I/O devices. Furthermore, circuit breaker pressure, transformer temperature or any other analog or digital parameter can be monitored. You can use the information gained to perform power analysis and to learn when preventive maintenance of critical equipment should be performed.

PRIMARY HISTORICAL TRENDING LOG FILE — LOG 1

Log any measured parameter from either the main unit or any of the option modules. Either 8, 16, 32 or 64 values can be logged per programmable interval.

SECONDARY HISTORICAL TRENDING LOG FILE — LOG 2

This log can be set up as an additional historical interval log or as an exclusive energy log. Either 8, 16, 32 or 64 values can be logged per interval.

OUT OF LIMIT LOG

The unit offers an independent out of limit log. This allows a user to download out of limit information to obtain a sequence of events for any occurrence. Utilizing the 1 ms clock resolution, the logs can be combined with different metered points throughout a distribution system to provide an accurate system-wide depiction of a power disturbance.

EVENT-TRIGGERED WAVEFORM RECORDING LOG

The meter records waveforms with a resolution of up to 512 samples per cycle.

The unit records the waveform when a value goes out of limit and when the value returns to normal. All information is time stamped to the nearest msec. The 8 onboard high-speed inputs can be tied to the waveform recording. You can record when the breaker tripped as compared to when the relay activated. This is very useful for fault and breaker integrity analysis.

The unit can be programmed to take more than one recording every time an event occurs. Thousands of cycles can be recorded per event.

ITIC/CBEMA LOG

The meter stores a separate ITIC/CBEMA log that records magnitude and duration of voltage clock resolution. The logs can be combined with different metered points throughout a distribution system to provide an accurate system-wide depiction of a power disturbance.

RELAY OUTPUT LOG

The unit records when a relay output from the external I/O is activated, timestamps the event and provides a reason for why the relay changed status.

INPUT STATUS LOG

This log is similar to the Relay Output Log: it allows the user to record when inputs change status.

UPLOADABLE FLASH MEMORY

The Nexus® 1252 meter utilizes uploadable flash memory technology on all processors and DSPs located in the unit. This insures that the unit can be upgraded without removing it from service.
**Use the Meter As an RTU**

Electro Industries offers multiple Analog and Digital I/O modules that mount externally to the Nexus® meter. The unit supports up to 4 I/O modules using internal power. An additional power supply extends I/O capability.

The meter’s Master port eliminates the need for RTUs in many substation applications. The meter can poll different I/O devices, log data and send data to a master station via Modbus or DNP 3.0 protocol. This I/O functionality is available in the Nexus® 1252 meter at much lower cost than traditional substation RTUs.

**RELAY CONTROL — PROGRAMMABLE LOGICAL PROTECTION AND CONTROL**

The Nexus® 1252 meter provides advanced logic and control on programmable limit settings. The 7000 values that the meter measures can have limits and logic set to trigger operations. This feature allows a user to configure the meter to be used as a control device for many applications such as:
- Capacitor Control
- Load Shedding
- Automatic Transfer Schemes
- Transformer Monitoring & Control
- Redundant Protection (Not designed for Primary Over-Current Protection)
- Many Other Control Functions

**GRAPHICAL PROGRAMMING INTERFACE FOR RELAYING AND CONTROL**

EIG’s unique ElectroLogic™ relay control structure allows users to develop up to 3 tiers of logic control based on limits and status conditions. All data is displayed in a graphical tree structure. The user can set logical descriptors, such as:
- AND/NAND/XAND Gates
- OR/ NOR/XOR Gates
- Hysteresis/NHysteresis Control

Using the graphical array, each tier can be configured to the desired logical scheme, enabling the meter to address complex control requirements. The meter's ElectroLogic™ relay control can be extended for a virtually unlimited number of relay outputs. Simply add additional I/O modules. Response time is typically less than 200 msec per I/O module, extendible to multiple seconds.

**Superior Construction and Isolation**

This unit is a rugged, durable device. It provides considerable protection and isolation from damaging outside forces.

**CASE CONSTRUCTION**

The unit is mounted in a shielded metal case. It is resistant to contamination from harmful dust, sand or other matter. All screws and hardware are stainless steel.

**POWER SUPPLY**

The power supply offers both MOV protection and active line filtering to reduce any damaging occurrences to the supply.

**VOLTAGE INPUTS**

The voltage inputs are optically isolated. Issues such as noisy grounds, switching noise, SWC or any other such problems pose no threat to the Nexus® 1252 meter.

**CURRENT INPUTS**

The current inputs are direct shorts. They offer a stud input U-Bolt design with an internal toroidal sensor. Since this is a 0.15" thick solid brass U-Bolt without solder or weld joints, the unit’s current input and surge withstand capability is significant.

**COMMUNICATION PORTS**

All communication ports are isolated from the main unit and additionally isolated from each other. This avoids dangerous ground loops.

**I/O MODULES**

Each I/O module is isolated from the main unit and from other I/O modules. No signal entering an I/O module can damage any other part of the Nexus® 1252 meter.
Onboard Communication for Every Application

Robust Communication For Every Option

**4 ISOLATED HIGH-SPEED COMMUNICATION PORTS**

The meter offers 4 built-in identical communication ports. Each port speaks any desired protocol. Standard protocols include Modbus RTU/ASCII and DNP 3.0 Level 2. Logs and Waveform events are available in Modbus format. Port 3 and Port 4 can be used as a Modbus master for I/O modules.

**INDUSTRY LEADING DNP 3.0 LEVEL 2 PLUS**

The Nexus® 1252 meter provides the industry’s most advanced DNP 3.0 protocol implementations. The meter complies with all DNP Level 1 and Level 2 certification requirements PLUS a host of additional features including:

- Up to 136 measurements (64 Binary Inputs, 8 Binary Counters, 64 Analog Inputs) can be mapped to DNP static points in the customizable DNP point map.
- Up to 16 relays and 8 resets can be controlled through DNP.
- Report-by-exception processing (DNP Events) deadbands can be set on a per-point basis.
- 250 events consisting of combinations of four events (Binary Input Change, Frozen Counter, Counter Change, Analog Change).
- Freeze Commands: Freeze, Freeze/No-Ack, Freeze with Time, Freeze with Time/No-Ack.
- Freeze with Time command enables the Nexus® meter to have internal time driven Frozen Counter and Frozen Counter Event data. When the Nexus® meter receives the Time and Interval, the data will be created.
- Third party certification is available.

**HIGH-SPEED TRANSDUCER OUTPUTS FOR CONTROL PURPOSES**

The meter offers 200 msec updates for all instantaneous readings. The unit can be a high-speed control transducer for power generation, transmission line synchronization and any other synchronizing and control scheme.

**VAUX INPUT**

The unit has a high-speed Vaux input. This input can be used for multiple purposes:

- Neutral to Ground
- Voltage Readings
- Synchronizing Schemes

The Vaux channel can be used to get the frequency, magnitude and phase angle on both sides of a switch or between generator and bus voltage.

**Additional Capabilities**

**8 BUILT-IN DIGITAL HIGH-SPEED STATUS INPUTS**

These inputs automatically sense whether the circuit is externally wetted. If externally wetted, the input will accept up to 300VDC. If internally wetted, the unit supplies the needed voltage for the desired control application.

**MULTIPLE COMMUNICATION PATHS**

(ONE EXAMPLE SHOWN BELOW)

- Laptop
- Modbus
- DNP 3.0 Level 2 Plus (1200 - 115200 Baud)
- EI I/O Modules
- Alarm
- Emails
- WebMod running MODBUS/TCP
- WebDNP also communicating
- TCP/IP Bus (Internet or Intranet)
- Internet package
- local pc
- scada
- control scheme
- other users

Multiple Socket Internet or Intranet Meter Access
Up to 12 Sockets Simultaneously
Optional Onboard Modem with Dial-Out

DIAL-OUT ON ALARM

With the built-in optional INP2 modem, the meter has dial-out capabilities that detect when an alarm occurs and dials out to provide notification. The Nexus® 1252 meter dials to EIG’s Dial-In Server EXT, which allows users to be paged or emailed with notification of events.

DIAL-OUT FOR OTHER EVENTS

The meter will dial out for the following circumstances:

- Limits Status Change
- High Speed Input Change
- Waveform Record Capture
- CBEMA Power Quality Event
- Control Output Change
- Filling of Meter Memory
- Cycling of Control Power

DIAL-IN SERVER EXT*

EIG’s Dial-In Server EXT* will record all notifications, accept downloads from the meter and allow users to be notified by email and paging automatically. Features of Dial-In Server EXT include:

- Unlimited Meters
- Scalable Multi-Server Architecture
- Email Notification
- Paging Notification
- Audible System Alarm

* Dial-In Server EXT is an add-on software component to the Communicator EXT™ application.

EMAIL/PAGING FEATURE

Once the software detects a call, the Communicator EXT™ application launches the Dial-Out feature, immediately alerting designated users via:

- Email (PC, PDA, Cell)
- Pager

Many users can be contacted simultaneously.

Improve Reliability with Substation System Equipment Monitoring

The Nexus® 1252 meter allows you to monitor the health and status of critical substation equipment such as transformers and circuit breakers. This insures the user that the electrical distribution infrastructure is sound and reliable.

TRANSFORMER MONITORING

- Measure Voltage, Current, Power and PF
- Limit on VA Ratings
- Data Trend and/or Alarm Transformer Temperature
- Log Ambient Temperature
- Monitor TAP Position

CIRCUIT BREAKER MONITORING

- Record Faults
- Monitor Operations of Relays and Breakers

- Record Fault Events with Millisecond Timing
- Count Operations
- Calculate Accumulated I^2T on Contacts
**P60N Graphical LCD Display**

P60N  
Touch-Screen LCD for a graphical data presentation. 320 x 240 pixels, CCFL Backlight. See P60N Datasheet for details. Up to 8 meters per display.

**P40N+ Series Multifunction LED Displays**

P40N  
Multifunction LED Display. Also used as Master Volt Display for single function remote. USB Front panel port for data downloads and real time polling.

P41N+  
Amp Display Slave

P43N+  
Watt/VAR/PF Display Slave

**Analog Transducer Signal Outputs**

1MAON4  
4 Analog Outputs, 0±1mA, self-powered, scalable

1MAON8  
8 Analog Outputs, 0±1mA, self-powered, scalable

2MAON4  
4 Analog Outputs, 4–20mA, self-powered, scalable

2MAON8

INPUT VOLTAGE RANGE
• 150 Volt PH-N, 300V PH-PH (Suffix-120) (Used with PTs for Extended Range)
• 300 Volt PH-N, 600 Volt PH-PH (Suffix-G)

VOLTAGE INPUT WITHSTAND CAPABILITY
• Voltage Inputs optically isolated to 2500V DC. Meets ANSI C37.90.1 (Surge Withstand Capability)

CURRENT INPUT RANGE
• 5 Amp Inputs 2x continuous programmable to any CT range
• Fault Current recording to 60 Amps peak secondary based on 5 Amp full scale
Note: 1 Amp and 0.25 Amp current inputs available as special order.

CURRENT INPUT WITHSTAND CAPABILITY (AT 23°C)
• 100 Amps for 10 Seconds
• 300 Amps for 3 Seconds
• 500 Amps for 1 Second
• Continuous Withstand Rating: 20 Amps

BURDEN
• Voltage Inputs: 0.05VA@120V rms
• Current Inputs: 0.002VA@5A rms

ISOLATION
All inputs and outputs are isolated to 2500 Volts. All Com Ports are additionally isolated from each other.

TEMPERATURE RATING
• Operating Temperature: (-40 to +70)°C
• P60N Display: (0 to 50) °C
• Humidity: Up to 95% Non-condensing

SENSING METHOD
• Up to 512 Samples per Cycle (Programmable)
• 16 Bit A/D Resolution – Dual Converters
• Accu-measure™ Auto-Calibration Technology
• True RMS

ACCURACY RATING
• This unit complies with ANSI C12.20 and IEC 62053-22 accuracy requirements.

UPDATE TIME
• 200 msec — High Speed Readings
• 1 Second — Revenue Accurate Readings

CONTROL POWER REQUIREMENTS
• 120V AC/DC (-20%) - 230V AC (+20%) (Suffix -D2)
• 24V DC (-20%) - 48V DC (+20%) (Suffix -D)
• Burden: 20 VA Max

FREQUENCY RANGE
• Fundamental 20– 65 Hz

COMMUNICATION FORMAT
• Programmable parity and stop bits
• Communication Protocols: Modbus TCP/IP, ASCII/RTU and DNP 3.0 Level 2 Plus

CONSTRUCTION
Housed in a metal case. All screws are stainless steel.

SHIPPING
• Total shipping weight: approx. 5 lbs (2.2 kgs)
• Shipping container dimensions: 14” x10“ x6” (35.6cm x 25.4cm x 15.2cm)
• Displays and I/O modules ship in separate containers.

COMPLIANCE
• ANSI C12.20 Class 0.2 and IEC 62053-22 (Accuracy)
• ANSI C62.41 (Surge)
• ANSI/IEEE C37.90.1 – Surge Withstand
• EN 61000-6-2 - Immunity for Industrial Environments: 2005
• EN 61000-6-4 - Emission Standards for Industrial Environments: 2007
• EN 61326-1 - EMC Requirements: 2006
• CE Marked
• UL and cUL Listed

Note: Please see product manual for comprehensive specifications.

Note: Readings are in percent of reading where applicable (a more accurate standard), not in percent of Full Scale (a less accurate standard).
To order a Nexus® 1252 meter:

1. Fill out the options desired on the order chart below. List accessories separately.
2. Specify display type and number.
3. Specify desired I/O modules and mounting bracket(s).
4. Specify the Communicator EXT™ 4.0 application.
5. If you provide CT and PT ratios and wiring, EIG will program the units at the factory.

Example:

OPTIONS:  
Nexus®1252-A-120-D2-60Hz-V2-INP200-P40N+ 1mAON4-8AI1-MBIO-COMEXT4P

This equates to a Nexus® 1252 Advanced meter with an operating voltage of 120, a 90-276 Volts AC/DC power supply, a 60 Hz frequency, V-Switch™ Key 2, an internal 10/100BaseT Ethernet port, a multifunction LED display, a 0-1mA output module, an analog input module, an I/O module mounting bracket and one site license for Communicator EXT™ software.

### Accessory Options

**DISPLAYS**

- P60N Graphical LCD Touch-Screen Display
- P40N+ Multi-Function LED Display/Master
- P41N+ Amp Display Slave
- P43N+ Watt/VAR/PF Display Slave

**SOFTWARE**

- COMEXT4P Communicator EXT™ Software Single-Computer License (One Site)
- DISEXT.1C Dial-In Server EXT For Modems Single-Computer License (One Site)
- DISEXT.MC Dial-In Server EXT For Modems Multi-Computer License (One Site)

**I/O MODULES**

- 1mAON4 4 Analog Outputs, 0±1 mA
- 1mAON8 8 Analog Outputs, 0±1 mA
- 20mAON4 4 Analog Outputs, 4-20 mA
- 20mAON8 8 Analog Outputs, 4-20 mA
- 8AI1 8 Analog Inputs, 0±1 mA
- 8AI2 8 Analog Inputs, 4-20 mA
- 8AI3 8 Analog Inputs, 0±5V DC
- 8AI4 8 Analog Inputs, 0±10V DC
- 4RO1 4 Relay Outputs
- 4PO1 4 Solid State Pulse Outputs
- 8DI1 8 Digital Status Inputs

**ACCESSORIES**

- PSIO Power Supply for Additional IO modules
- MBIO I/O Mounting Bracket (must be ordered with purchase of I/O module)
- INP200 Total Web Solutions 10/100BaseT Ethernet
