**Metering and Communication**

- Multilevel Cyber Secure Encrypted Configuration
- Advanced Web Server with Waveform Analysis Tools
- Up to 1024 Samples per Cycle-based Measurements; Extended Frequency Range
- 0.06% Energy Accuracy Over Wide Dynamic Measurement Range; Meets ANSI C12.20 0.1 Accuracy Class
- Highly Accurate and Stable Measurements Using Multi-Gain™ Sensing
- 6 Available Communication Ports, Including Modbus and DNP3 Protocols and RTU Master
- Two Independent Ethernet Ports, with Unique IP Addressing, Port Control for Security and Encrypted Email on Alarm
- Supports Wideband Frequency 20-500 Hz

**Advanced Power Quality Analysis**

- Class A IEC 61000-4-30 Edition 3 Power Quality Measurements
- IEC 61000-4-15 Flicker Measurements
- IEC 61000-4-7 Harmonic Measurements
- EN 50160 Power Quality Reports
- Manual Waveform Capture
- New CORE™ Logging Architecture
- Easy Installation of Transducer and Separate Display
- Direct Physical Retrofit to Nexus® 125X Series Meter/Transducer with Greater Functionality
- Separate 3 Line LED Displays and New Color Touchscreen LCD Display
Introduction

Electro Industries’ Nexus® 1450 meter is a powerful energy meter that provides accurate electrical energy measurements and offers advanced capabilities for power quality analysis and determining electrical power reliability. The meter is a transducer base with a separate display. The transducer base retrofits to existing Electro Industries’ Nexus® 1250 and 1252 meters. The Nexus® 1450 meter is ideal for existing switchboard panels, since it can be installed without cutting panel doors. The separate display mounts into existing analog meter knockouts.

The Nexus® 1450 meter is protected with a multi-level Cyber Secured encrypted configuration with 10 highly secure encrypted user IDs and passwords that help prevent tampering and hacking of your power system data. The meter’s built in WebView™ Energy Dashboard allows you to analyze metering data without needing software. You can navigate easily through multiple webpage views and get detailed information on energy usage and power quality: view real time data, analyze stored history logs, view alarms and waveform records.

With 6 simultaneously operating communication ports, the meter is a communication hub to multiple software systems. The Nexus® 1450 meter has 4 serial ports that speak Modbus and DNP3 protocols. It also has two independent Ethernet ports, consisting of a 10/100BaseT copper RJ45 connector and an ST Terminated 100Base FX Fiber Optic Ethernet port. Each Ethernet port has a unique IP address. Through the meter’s 6 ports, a user is able to communicate to multiple computer-based systems, providing data to entities throughout an enterprise. The serial communications ports offer RTU Master capability, and the Ethernet ports support encrypted email on alarm.

The meter also excels at measuring power quality, including waveform recording; manual waveform capture; and IEC 61000-4-7, IEC 61000-4-15, and IEC 61000-4-30 Class A Edition 3 compliance. The Nexus® 1450 meter lets you look at the reliability of the electrical power circuit to determine causes of faults, voltage surges and sags, and harmonics.

Multi-Gain™ Sensing Provides Superior Accuracy

The Nexus® 1450 meter utilizes EIG’s latest measurement-sensing technology - Multi-Gain™. Multi-Gain™ technology uses two sensors on the current inputs - a high gain sensor and a lower gain sensor. Each sensor simultaneously measures the current signal coming from the external current transformers. The meter’s intelligent processing looks at the signal level and determines the optimal sensing circuit for the highest accuracy measurement. With this technique, the meter has 0.06% Energy accuracy throughout an extended measurement range, which is a defining trait of Nexus® Series meters.

The meter’s standard pickup range starts as low as 1 mA, and high accuracy is attained at 25 mA. Multi-Gain™ metrology allows the same meter to be used on both 5 A secondary and 1 A secondary CTs. The meter should maintain high accuracy measurement throughout its installed life. Refer to the accuracy chart on the next page, for details.

Multi-Gain™ Metrology allows the Nexus® 1450 meter to have highly repeatable and stable measurements throughout range.

* For 50/60 Hz measurement; ** (0.025 A to 20 A at PF=1); The Nexus® 1450 meter also supports wideband accuracy for 20 to 500 Hz applications; full accuracy specifications are given in the Nexus® 1450 Meter Installation and Operation Manual.

### Precision Crystal Time Reference:

The Nexus® 1450 meter is equipped with an internal clock crystal accurate to 3.5 PPM over the full operating temperature range and 5 PPM at over ten years of use. This highly accurate trimmed clock design allows users to maintain accurate time when running on crystal synchronization. The meter's clock crystal will drift less than 6 seconds per month from (0-40) °C.

Additional time sync methods include:

- Line frequency sync.
- DNP3 time sync.
- IRIG-B time sync.
- SNTP time sync.

### Advanced Energy Meter for Primary Loads

The Nexus® 1450 unit is an electrical energy meter designed to be used for any important application. In addition to highly accurate energy measurement, the meter features:

- Full 4 quadrant metering.
- Max/Min recording with timestamp.
- Extensive logging with 8 logs of programmable historical profiles.
- Built-in CORE™ log for web trending.
- Transformer and Line Loss compensation: for both iron and copper, and total substation losses.
- CT and PT compensation: to correct instrument transformer errors.
- Coincidental readings: e.g., PF or VARs at time of Peak Demand.
- Load aggregation/universal metering: pulse inputs can be used to aggregate or accumulate different loads. Utility commodities such as gas and water can also be accumulated.

### On-board Time of Use Measurements:

The Nexus® 1450 meter uses a perpetual Time of Use (TOU) calendar that only needs to be set up once. The TOU implementation allows the user to set up multiple tariffs to meet any contractual obligations. It also allows the user to customize any energy parameter for TOU. The 16 available TOU registers can be configured not only for TOU built-in energy readings, but also for any stored data from pulses or other readings that need TOU functionality.

- Up to four seasons - seasons can be customized.
- Flexible billing periods/rates/holidays/schedules setup.
- Cumulative and continuous cumulative demand are available.
Data Logging and Internal Storage

The Nexus® 1450 meter provides advanced capabilities for storing measured values over time, for trending and analysis. The meter has up to 4 GB of memory, with up to 1.2 GB allocated exclusively to logging and user storage, and is preconfigured to store its core measurements (in the CORE™ log) every 15 minutes, without any user intervention. Core measurements include 142 different values. Additionally, a user is able to configure up to 8 historical logs. All logs work with a FIFO buffer and roll over when filled. The following logs are available:

- **Trending Log:** The meter supports up to eight historical, trending logs of 64 data channels per log, acting as a traditional load profile recorder with up to 8 separate logs.

- **System Events Security Log:** This anti-tampering log records all events in the meter, with an associated timestamp. The unit records:
  - Resets.
  - Programming changes.
  - Password access changes.
  - Time changes.
  - Power up/down.
  - Change of Firmware.

* The CORE™ log automatically records readings for 142 parameters at the logging interval. The default interval is 15 minutes. Days are based on approximately 100 records per day.

** Logs 1 - 8 are user-assignable and allow 64 parameters per log. Days are based on approximately 100 records per day.

*** The number of waveform records depends on the sampling rate and the length of waveform recording. V1 offers up to 512 samples per cycle recording and V2 offers up to 1024 samples per cycle recording.

- **Input Status Change Log:** This log supplies information on the state of the meter’s internal digital inputs.

- **Limit Log:** The Limit/Alarm log can be set to record on high and low conditions for up to 32 user programmable limits.

- **Power Quality Log:** This log captures power quality events, such as surges and sags, and lets you view and analyze the data through power quality graphs, such as the ITI CBEMA Curve and SEMI F47 standards.
Power Quality Measurements

Critical sensitive equipment and over utilized distribution systems need to be monitored for proactive system reliability improvements. By measuring power quality indices such as voltage anomalies, harmonics, flicker, imbalances and many other conditions, you are able to quantify your system reliability. Recording waveform events on sags and swells, including peak and duration of the event, with microsecond resolution, will facilitate forensic engineering analysis of harmful events in your power system. The Nexus® 1450 meter is designed to the highest standards for power quality, including IEC 61000-4-7, IEC 61000-4-15 and IEC 61000-4-30 Class A Edition 3. It calculates weekly pass/fail reports using the EN 50160 standard.

IEC 61000-4-30 Class A Reporting:

- Supporting the most stringent international power quality standards, the Nexus® 1450 meter offers full reporting of power quality conditions using the IEC 61000-4-30 Class A methodology Edition 3.
- Operates on both 230 volt/50 Hz and 120 volt/60 Hz.

IEC 61000-4-15 Flicker Measurement:

- The Nexus® 1450 meter measures Flicker in compliance with the IEC 61000-4-15 Class A standard.
- Operates on both 230 volt/50 Hz and 120 volt/60 Hz.

IEC 61000-4-7 Harmonics:

- View harmonic magnitudes to the 511th order for each voltage and current channel, using EIG’s Log Viewer software.
- Harmonic magnitudes and phase angles in real time are resolved to the 127th order.
- Obtain THD, TDD, and K-Factor.
- Conduct power quality analysis at the high end of the harmonic magnitude spectrum.

Limits/Alarms:

The Nexus® 1450 meter lets you set multiple programmable limits for any measured value and for conditions set up in a Boolean logic tree. This feature will record events based on threshold settings. Limits can be used with timers and logic to trigger control events. The Ethernet ports can be programmed to send emails on alarm.

EN 50160 Report:

The meter calculates weekly EN 50160 power quality reports. The reports are available on the web server and can be easily accessed to determine power system reliability.
**Waveform Recording:**

The Nexus® 1450 meter offers waveform recording at a sampling rate of up to 1024 samples/cycle. The meter can be programmed to record waveforms on multiple power quality events, such as surges and/or sags (manual waveform capture through software is also supported). 16-bit A/D conversion provides precise waveform resolution. Both voltage and current recording offer pre and post-event analysis. Fault recording offers 8 times full-scale capture capability. Both hardware and software triggers are available. The meter also supports manual waveform capture.

The waveforms can be viewed either through CommunicatorPQA™ software or on the meter’s built-in web browser, or they can be downloaded to third party software for analysis. By analyzing the waveforms, the nature and source of power quality anomalies can be determined, and steps can be taken to remedy the situation. Waveform recording for wideband frequencies is also supported.

**Phasor Analysis:**

Communicator PQA™ software lets you view the phase angles and symmetrical components for voltage and current, helping you analyze electrical system problems.

**Cyber Secured Configuration Protects Meter from Tampering:**

- Highly Secure Encrypted Passwords - 128 Bit AES Encryption.
- 10 Customizable Users, with Passwords up to 30 Characters.
- Password Fail Timeouts Virtually Eliminate Brute Force Hacking.
- 4 Roles with Customized User Permissions.
- Physical Seals and Lock-outs to Prevent Remote Hacking or Tampering.
- Signed Firmware Helps Prevent Tampering with Meter Operation.

**V-Switch™ Key technology**

The Nexus® 1450 meter is equipped with V-Switch™ key upgrade technology that lets you upgrade meter functionality even after installation. This means you can purchase what you need now and then upgrade whenever you need the additional features. Following are the available V-Switch™ keys:

* The unit has 4000 MB flash memory installed, for longer reliable life. Some of the memory is allocated to wear-leveling and system use.
Advanced Communication

The Nexus® 1450 meter is equipped with extensive communication capabilities that allow it to speak with many different SCADA or other communication systems, simultaneously. The meter has 6 communication ports as a standard offering. These ports include 4 serial ports and 2 Ethernet-based communication ports. The Ethernet ports include an ST terminated fiber optic port and an RJ45 port. Both ports use separate IP addresses, so that they can run on simultaneous redundant networks. The Ethernet ports offer encrypted email on alarm and port control for security.

Details of Ports:

- 6 standard Com ports.
- 4 serial ports - RS485 (one of the ports is RS485/RS232 selectable); RTU Master capability.
- 2 independent Ethernet ports - RJ45 and Fiber Optic, with separate IP addresses, advanced port control, and encrypted email on alarm.
- Modbus RTU, Modbus ASCII, Modbus TCP/IP, DNP3 Level 2 communication.
- All ports can be communicating simultaneously.
- Ports 3 and 4 can be used as Master ports to control up to 4 I/O modules each, acting as an RTU master to slave bus devices.
- Encrypted email on alarm: email on exceeded limit, waveform recording, status change, password tampering, and many other conditions.

Standard I/O

8 Built-in Digital Status Inputs:

- Inputs automatically sense whether the circuit is externally wetted.
- If externally wetted, input up to 150 V DC is accepted.
- If internally wetted, the meter supplies the necessary voltage for the control application.
- Inputs can be used as pulse accumulators for counting pulses from other meters.

VAUX Input:

- Neutral to ground or aux voltage readings for synchronizing schemes, for example, obtaining the frequency, magnitude, and phase angle on both sides of a switch or between generator and bus voltage.

Two Standard Pulse Outputs:

- Solid State, form A, 35 ohm max on resistance.
- 120 mA continuous, 350 mA max for 10 ms.
- Peak voltage: 350 V DC.
- Switching rate max: 10/s.
- Support pulse-counting applications.
Revenue Seal

The Nexus® 1450 meter has a lockable cover for voltage and current inputs, a Demand and programming Reset button seal, and two physical meter seal locations. Seals other than Demand/programming are ordered separately.

Optional I/O Modules

Analog Outputs:

- 1mAON4/1mAON8: 4 or 8 Analog Outputs, 0±1 mA, self-powered, scalable, bidirectional.
- 20mAON4/20mAON8: 4 or 8 Analog Outputs, 4-20 mA, self-powered, scalable.
- Wiring: Common Mode.
- Accuracy: 0.1% of Full Scale.
- Calibration: Self-calibrating.
- Scaling: Programmable.
- Ordering: Up to 4 Analog Output modules.

Analog Inputs:

- 8AI1: 8 Analog Inputs, 0±1 mA.
- 8AI2: 8 Analog Inputs, 4-20 mA.
- 8AI3: 8 Analog Inputs, 0±5 V DC.
- 8AI4: 8 Analog Inputs, 0±10 V DC.
- Wiring: Common Mode.
- Accuracy: 0.25% of Full Scale.
- Scaling: Programmable.
- Ordering: Up to 4 Analog Input modules.

Digital Inputs:

- 8DI1: 8 Digital Status Inputs Wet/Dry.
- Auto-Detect Up to 300 V DC.

Digital Dry Contact Relay Outputs:

- 4RO1: 4 Relay Outputs, 5 A, 250 V AC/30 V DC, Form-C Latching.
- Ordering: Up to 4 Digital Dry Contact Relay Outputs.

Digital Solid State Pulse Outputs:

- 4PO1: 4 Solid State Pulse Outputs, Form A or C KYZ pulses.
- Maximum Pulse Speed: 20 pulses per second.
- Ordering: Up to 4 Digital Solid State Pulse Output modules.

I/O Module Accessories:

- PSIO: Power supply for up to 4 additional I/O modules. This accessory may be needed when using 3 or more displays and/or modules.
- MBIO: Mounting bracket for external I/O modules. Must be ordered with external I/O module (required).

Optional Displays (displays connect to any RS485 port):

- P40N+: multifunction LED Master display supplies visual display of meter readings; has a USB connection for direct data download of readings; and can also be used as a Master volt display. The P40N+ displays are ideal for analog ANSI meter retrofits.
- Optional Slave displays P41N+ (Ampere display) and P43N+ (Power display) can be daisy-chained.
- NEW! P70N color touchscreen display offers multiple pre-configured screens of meter readings and power quality data. It can be mounted in a panel or as a retrofit to an existing ANSI meter cutout using the SMKP70N mounting kit.

Digital Solid State Pulse Output Modules:
WebView™ Energy Dashboard

Built-in Energy Dashboard Allows You to Analyze Metering Data Without Needing Software:

The Nexus® 1450 meter utilizes a unique HTML5-based web server. This new web server acts as an Energy Dashboard, allowing the user to view real time data, as well as to analyze stored historical logs, alarms, and waveform records. The WebView™ Energy Dashboard is built on a responsive architecture, so that it will work properly on hand held browser-based devices, such as tablets and phones.

Using the WebView™ Energy Dashboard, the user is able to navigate easily through multiple webpage views, getting detailed information on energy usage and power quality:

- Real time voltage and current readings and detailed charts, so that the user can see energy use over time.
- Energy usage, quadrant energy charts and trending.
- Waveform event records, including zoom and pan.
- Status of digital inputs.
- Phasor diagram.
- Flicker readings, including PST and PLT.
- Symmetrical components.
- Detailed information for accumulators and aggregators.
- Meter information and diagnostic webpages for meter health and status.
- View data directly from the meter's web viewer.
Nexus® 1450 Meter Base Dimensions

Nexus® LED/LCD Display Dimensions

Note 1: Mounting and I/O module details are available in the Nexus® 1450 Meter Installation and Operation Manual.

Note 2: P41N+ and P43N+ displays utilize the same dimensions as the P40N+ display.
3 Wire, 2 Element Delta Direct Voltage with 2 CTs

Important: The Potential between A, B, C and GROUND must be less than 347 V AC.

Additional wiring diagrams for the meter are available in the Nexus® 1450 Meter Installation and Operation Manual.
Specifications

Voltage Input Range:
- Absolute range between any voltage inputs: (20 to 720) V AC
- Pickup voltage: 5 V AC

Isolation:
- Voltage isolated to 2550 V AC

Current Input Range:
- Supports Class 2 and Class 20 in one input configuration
- Programmable to any CT ratio
- Fault current recording to +/− 80 A peak
- Pick-up current: 1 mA

Current Input Withstand Capability (at 23°C):
- 100 A for 10 seconds
- 300 A for 3 seconds
- 500 A for 1 second

Burden:
- Voltage Inputs: 5 Mohms per burden
- Current Inputs: 0.028 VA per phase max at 20 A

Frequency Ranges:
- Nominal: (42.5 to 69.5) Hz
- Wide band: (20 to 500) Hz
- Customizable high-speed readings - update rate from 2 to 20 cycles RMS

Control Power Requirements:
- D2 Option: (96-276) V @ 50/60 Hz or DC and (20-500) Hz V AC
- Option: (18-60) V DC
- Burden: 20 VA max w/o I/O or display; 40 VA max with I/O and display

Communication:
- Baud rate up to 115200 bps
- Programmable parity and stop bits
- Serial Communication protocols: Modbus ASCII/RU, DNP3
- Ethernet: Modbus TCP, DNP3, SMTP, HTTP and HTTPS
- RS485 ports
- RS232 port (shared)
- Optional P40N+ display offers USB Type B communication

Accuracy Ratings:
- Energy measurement accuracy at 0.06% (0.025 A to 20 A at PF = 1)
- Full accuracy specifications available in Nexus® 1450 meter User Manual
- Time clock: 3.5 ppm for
- °C - less than 6 seconds per month
- °C - less than 10 seconds drift per month on crystal
- Frequency Ranges:
- Pick-up current: 1 mA
- Fault current recording to +/- 80 A
- Programmable to any CT ratio
- Supports Class 2 and Class 20 in

Environmental:
- Operating temp: (-25 to +70) °C
- Storage temp: (-40 to +70) °C
- Operating temp: (-25 to +70) °C
- Wide band: (20 to 500) Hz
- Nominal: (42.5 to 69.5) Hz
- Protection Class: IP30

External I/O Modules:
- 1mAON4: 4 Analog Outputs, 0 ± 1 mA
- 1mAON8: 8 Analog Outputs, 0 ± 1 mA
- 2mAON4: 4 Analog Outputs, 0-20 mA
- 2mAON8: 8 Analog Outputs, 0-20 mA
- 8AI1: 8 Analog Inputs, 0 ± 1 mA
- 8AI2: 8 Analog Inputs, 0-20 mA
- 8AI3: 8 Analog Inputs, 0 ± 5 VDC
- 8AI4: 8 Analog Inputs, 0-10 VDC
- 4RO1: 4 Relay Outputs
- 4PO1: 4 Solid State Pulse Outputs
- 8DI1: 8 Digital Status Inputs
- PSIO: Power Supply for up to 4 additional I/O modules with external I/O module)
- MBIO: I/O mounting bracket (must be ordered with external I/O module)

I/O Modules:
- 1mAON4: 4 Analog Outputs, 0 ± 1 mA
- 1mAON8: 8 Analog Outputs, 0 ± 1 mA
- 2mAON4: 4 Analog Outputs, 0-20 mA
- 2mAON8: 8 Analog Outputs, 0-20 mA
- 8AI1: 8 Analog Inputs, 0 ± 1 mA
- 8AI2: 8 Analog Inputs, 0-20 mA
- 8AI3: 8 Analog Inputs, 0 ± 5 VDC
- 8AI4: 8 Analog Inputs, 0-10 VDC
- 4RO1: 4 Relay Outputs
- 4PO1: 4 Solid State Pulse Outputs
- 8DI1: 8 Digital Status Inputs
- PSIO: Power Supply for Additional I/O Modules
- MBIO: I/O Mounting Bracket

I/O Modules:
- Additional I/O modules
- DIN Rail Mount Kit for Nexus® 1450 meter

MBIO

E171103

1mAON4: 4 Analog Outputs, 0 ± 1 mA

1mAON8: 8 Analog Outputs, 0 ± 1 mA

2mAON4: 4 Analog Outputs, 0-20 mA

2mAON8: 8 Analog Outputs, 0-20 mA

8AI1: 8 Analog Inputs, 0 ± 1 mA

8AI2: 8 Analog Inputs, 0-20 mA

8AI3: 8 Analog Inputs, 0 ± 5 VDC

8AI4: 8 Analog Inputs, 0-10 VDC

4RO1: 4 Relay Outputs

4PO1: 4 Solid State Pulse Outputs

8DI1: 8 Digital Status Inputs

PSIO: Power Supply for Additional I/O Modules

MBIO: I/O Mounting Bracket

Note: Please see the Nexus® 1450 meter Installation and Operation Manual for comprehensive specifications.
